

RISK ASSESSMENT 20/06/2017

RISK ASSESSMENT FOR BALLOON MODELLER: GEOFF EVANS (Lord Geoffrey The Balloon Guy)

Possible Risks and subsequent control:

Possible risk of balloons bursting and causing alarm or injury:

The audience is warned of the possibility of such.

If balloon bursts it makes a sound no greater than 98db.

This will not injure anyone's hearing even if they are in close proximity.

Possible risk of a child eating a piece of balloon:

The balloons are not poisonous and any broken pieces are disposed of properly and carefully.

Balloons are made of latex which is totally biodegradable. If pieces of balloon are accidentally swallowed by animal or human, they will dissolve in the stomach and pass through naturally.

Possible risk of slipping on pieces of balloon:

Dispose of any balloon pieces carefully

Modelling balloons are best quality standard. Sufferers of latex allergy know their condition and avoid balloons

In summary, there is no perceived risk for the above act.

There are minimal/zero risks attached to the activity
